# SMOKE ALARM
EXTENSION PLATE

EXTENSION PLATE

The Emerald Extension Plate is intended to conceal any holes or damage that may be present in the ceiling after removing the original alarm. It is specifically designed for the installation of Emerald Smoke Alarms and is compatible with both the 9V and 3V series.
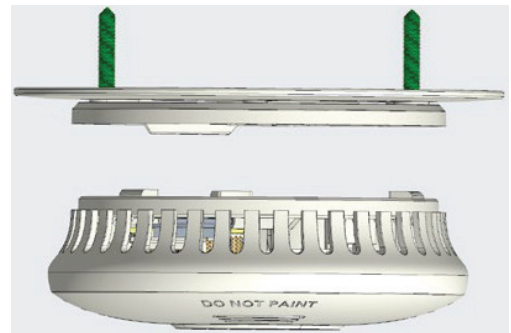

Installation options include 3M adhesive or screwing it with the alarm's backing plate.
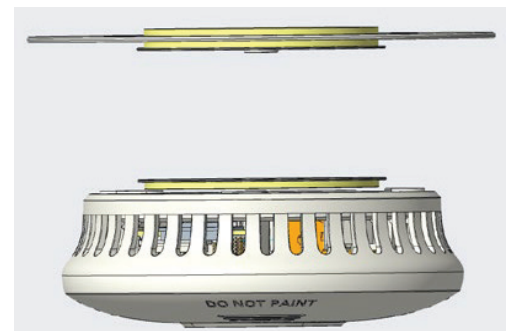

FEATURES

- Conceals ceiling holes or damage after alarm removal
- Designed for Emerald Smoke Alarms installation
- Compatible with 9V and 3V series smoke alarms

SPECIFICATIONS
